

C-Console 1.3 & Cubase VST24 Sync Setup

If you want Cubase to be the Slave here is the setup

Install Hubi's Loopback available for free from C-Mexx at:

<http://www.c-mexx.com/english/downloads/freebies/mlbk26a.zip>

For NT/Win 2000 users we recommend MIDI YOKE available at www.midiox.com

In C-Console

Automation/Sync/Connection

Midi In LB1
Midi Out LB2
30 fps
Send MTC

In Cubase:

Options/Synchronization

Sync Source

Time Code Base is Midi Time Code
From input LB2
Frame rate 30 fps

Hit OK

Now on the transport bar in Cubase select Sync and press play in C-Console...That's all you gotta do...

If you want Cubase to be the Master here is the setup

In C-Console:

Automation/Sync/Connection

Midi In LB1
Midi Out LB2
30 fps
Receive MTC

In Cubase:

Options/Synchronization

Sync Source

Time Code Base is Internal
Frame rate 30 fps

Sync Out

Midi Timecode is LB1
Midi Clock is LB1

Hit OK

Now on the transport bar in Cubase press play an C-Console will
chase...That's all you gotta do...

Have a ball!!!!

C-Ya!!!!
